

[Overview](#)[S.M.A.R.T.](#)[History](#)

Critical

Multiple UNC errors have occurred recently on this drive. We recommend running an extended S.M.A.R.T. test on the drive and inserting the drive into another functioning drive slot to determine whether the errors are from the drive or drive slot.

Statistics

Temperature:	35 °C / 95 °F
Power-on time:	2049 hours
Drive reconnection count:	0
Drive re-identification count:	0

S.M.A.R.T. Attribute

Each threshold is defined by the drive manufacturer. Users will be notified when the attribute value is below the threshold value. If you receive this notification, please make sure to back up the data on this drive to prevent potential data loss caused by drive failure.

ID	Attribute	Value	Worst	Threshold	Raw Data
5	Reallocated_Sector_Ct	100	100	010	0
9	Power_On_Hours	100	100	000	2049

Drive 7 - SPCC Solid State Disk (SSD)

476.9 GB

Critical

Location:	Filetank2
Storage pool:	-
Allocation status:	Not Initialized i
Health status:	Critical
Estimated lifespan:	-
Temperature:	35 °C / 95 °F
Serial number:	MQ13A77311369
Firmware version:	V6.2.10
4K native drive:	No

Category:	Storage
Subject:	I/O error occurred to Drive 7 on Filetank2.
Time:	28/11/2025 21:17:22

An I/O error occurred to Drive 7 on Filetank2, but the drive is working properly now after several retries. The error may have been caused by bad sectors. We recommend backing up your data immediately to ensure data integrity. Afterward, please go to **Storage Manager > HDD/SSD > HDD/SSD > Health Info > S.M.A.R.T.** to run the **Extended Test**, and then refer to the test result for the recommended actions.
